EDUCATION

Bachelor's Degree in Computer Science — **March 2017 - July 2021**
Kohat University of Science and Technology (KUST) — CGPA: 3.13/4.0

Intermediate in Engineering — **2015 - 2017**
Quaid Inter College, Kohat — Percentage: 65%

SKILLS SUMMARY

- **Languages** C# (primary), SQL
- **Game Development** Unity, gameplay systems, level design, playable ads
- **Multiplayer & Networking** Photon PUN 2, Photon Fusion, Unity Netcode for GameObjects (NGO)
- **Backend & Services** Firebase (SDK and REST API), PlayFab, Unity Gaming Services, REST APIs
- **Monetization & Ads** AdMob, AppLovin MAX, ad mediation
- **Architecture & Patterns** Singleton, Observer, State, event-driven architecture, ScriptableObjects
- **Agentic AI Tools** Cursor, Codex, Antigravity, Claude
- **Tools** Postman, Git, Microsoft Office
- **Soft Skills** Teamwork, collaboration, problem-solving, communication, adaptability

WORK EXPERIENCE

Senior Unity Developer | Funsol Technologies — **11 May 2026 - Present**

Islamabad

- Develop games for **iOS and Android** and create playable ads through structured AI-assisted coding workflows.
- Use **Cursor, Codex, Antigravity, and Claude** with focused prompts and clearly scoped tasks to support game development and mobile production.
- Maintain **project context and reusable memory** to reduce repeated instructions and unnecessary AI usage while improving development efficiency.

Senior Unity Developer | Buggbyte Studios — **April 2024 - 10 May 2026**

Lahore

- Delivered gameplay systems and solutions for client projects in a **services-based development environment.**
- Developed and maintained **real-time multiplayer systems** using Photon PUN 2, Photon Fusion, and Unity Netcode for GameObjects (NGO).
- Integrated **Firebase, PlayFab, Unity Gaming Services, and REST APIs** to support game backend functionality.
- Implemented **Google, Apple, and Facebook authentication** and session management.
- Built scalable gameplay systems using **State, Observer, and Singleton design patterns** and event-driven architecture.
- Delivered production-ready systems for **Android, iOS, WebGL, and PC.**

Unity Developer | Webbuggs **November 2022 - March 2024**

Lahore

- Developed **core gameplay systems** within a product-focused game development pipeline.
- Built UI systems and gameplay logic, and developed **animation controllers** using Blend Trees and Animator State Machines.
- Integrated **AdMob and AppLovin MAX** for monetization and ad mediation.
- Created reusable gameplay components using **ScriptableObjects and modular architecture.**
- Contributed to **level design and gameplay tuning** for shipped mobile titles.
- Optimized **game performance** for mobile devices.

Trainee Unity Developer | Aptech Media **August 2022 - October 2022**

- Applied Unity fundamentals to implement **C# scripts and gameplay mechanics.**
- Built prototypes using **object-oriented programming and basic design patterns.**
- Implemented **animation, UI, and core game loops** in Unity prototypes.
